CONTENTS OF VOLUME TWENTY-NINE

NUMBER 1. *Biological Basis of Radiotherapy*

Scientific Editor: N. M. BLEEHEN

		PAGE
Introduction	*Sir Brian Windeyer*	1
The relevance of experimental radiobiology to radiotherapy: present limitations and future possibilities	*Tikvah Alper*	3
Radiation quality and its influence on biological response	*D. K. Bewley*	7
Molecular radiobiology	*M. Ebert*	12
Radiation damage and repair phenomena	*B. W. Fox & L. G. Lajtha*	16
Tumour cell kinetics	*L. F. Lamerton*	23
Radiation and the vascularity of tumours	*R. H. Thomlinson*	29
Exploitation of the oxygen enhancement ratio in clinical practice	*W. Duncan*	33
The significance of the time–dose relationship in radiotherapy	*George Wiernik*	39
Effects of radiation dose-rate: from protracted, continuous irradiation to ultra-high dose-rates from pulsed accelerators	*R. J. Berry*	44
Chemical radiosensitization of hypoxic cells	*G. E. Adams*	48
Combination therapy with drugs and radiation	*N. M. Bleehen*	54
Pre-operative and post-operative irradiation	*Sir Oliver Scott*	59
Treatment with unsealed radioisotopes	*W. R. Greig, I. R. McDougall & Keith E. Halnan*	63
Early adverse effects of radiation	*Andrew S. McLean*	69
Late effects of radiation (excluding carcinogenesis)	*Patricia J. Lindop*	74
Late effects of radiation: carcinogenesis	*R. H. Mole*	78

Notes on Contributors 84

Book Reviews 87

NUMBER 2. *Catecholamines*

Scientific Editor: LESLIE L. IVERSEN

		PAGE
Introduction	*W. D. M. Paton*	91
Histochemical visualization of peripheral and central adrenergic neurones	*B. G. Livett*	93
Catecholamines in invertebrates	*G. A. Kerkut*	100
Catecholamine biosynthesis	*H. Blaschko*	105
The catabolism of catecholamines: recent studies	*D. F. Sharman*	110
Biochemical aspects of monoamine oxidase	*K. F. Tipton*	116
Multiple forms of mitochondrial monoamine oxidase	*Moussa B. H. Youdim*	120
Mechanisms involved in the release of noradrenaline from sympathetic nerves	*A. D. Smith*	123
Catecholamine uptake processes	*Leslie L. Iversen*	130
Uptake of noradrenaline by smooth muscle	*J. S. Gillespie*	136
Classification and properties of peripheral adrenergic receptors	*D. H. Jenkinson*	142
Prostaglandins at adrenergic nerve-endings	*E. W. Horton*	148
The mechanisms of action of some antihypertensive drugs	*R. Laverty*	152
Adrenergic drugs in the treatment of hypertension	*C. T. Dollery*	158
Activation and blockade of β adrenoceptors in common cardiac disorders	*J. W. Black & B. N. C. Prichard*	163
Functional aspects of the role of catecholamines in the central nervous system	*Marthe Vogt*	168
Dopamine in the basal ganglia: its role and therapeutic implications (including the clinical use of L-DOPA)	*Oleh Hornykiewicz*	172

Notes on Contributors 179

Book Reviews 181

NUMBER 3. *Advances in Molecular Genetics*

Scientific Editor: W. HAYES

		PAGE
Introduction	*C. H. Waddington*	185
DNA synthesis	*John Cairns*	188
Replication of DNA in eukaryotic chromosomes	*H. G. Callan*	192
Molecular architecture of human chromosomes	*H. J. Evans*	196
Regulation of cell division in bacteria	*W. D. Donachie*	203
Positive and negative control of transcription in bacteriophage λ	*John Davison*	208
Control of transcription in bacteria	*J. G. Scaife*	214
Genetic and structural analysis of transfer RNA	*J. D. Smith*	220
DNA repair and recombination	*Paul Howard-Flanders*	226
Molecular structure and function in RNA phages	*John Hindley*	236
Genetic studies on RNA tumour viruses and their hosts	*G. S. Martin*	241
Genetic analysis of animal viruses	*D. A. Ritchie*	247
Proteins of polyoma virus and SV40	*L. V. Crawford*	253
Nuclear transplantation and regulation of cell processes	*J. B. Gurdon*	259
Cytoplasmic genetic systems of eukaryotic cells	*D. Wilkie*	263
The genetics of behaviour	*Sydney Brenner*	269

Notes on Contributors 272

Book Reviews 274

INDEX TO VOLUME TWENTY-NINE

Names printed in capitals are those of authors who have contributed papers. Titles of books are printed in italics.

A

Actinomycin D, combination with radiotherapy, 57
ADAMS, G. E.: Chemical radiosensitization of hypoxic cells, 48
Adrenergic drugs in treatment of hypertension, 158
—— neurones, blocking drugs, 152
—— —— peripheral and central, histochemical visualization, 93
—— receptors, peripheral, classification and properties, 142
β-Adrenergic receptors, activation and blockade in common cardiac disorders, 163
—— —— anti-arrhythmic activity, 166
β Adrenoceptors, *see* β-adrenergic receptors
ALPER, T.: Relevance of experimental radiobiology to radiotherapy: present limitations and future possibilities, 3
Amines, sympathomimetic, interaction with prostaglandins on effector cells, 148
Amino acids, effects of ionizing radiation, 14
Angina pectoris, cardiac β-adrenoceptor blockade in, 164
Anoxia, effect on radioprotection, 10
Antihypertensive drugs, mechanisms of action, 152
Ashworth, J. M. & Smith, J. E. (editors): *Microbial differentiation*, 274

B

Bacteria, cell division in, 203
—— —— —— localization of sites, 203
—— —— —— timing, 205
—— mutants, 204
—— transcription in, control, 214
Bacteriophage λ, transcription, positive and negative control, 208
Behaviour, genetics of, 269
Bennett, M. R.: *Autonomic neuromuscular transmission*, 182
BERRY, R. J.: Effects of radiation dose-rate: from protracted, continuous irradiation to ultra-high dose-rates from pulsed accelerators, 44
BEWLEY, D. K.: Radiation quality and its influence on biological response, 7
Biochemical genetics of man, 275
Biochemistry: *Essays in physiology and biochemistry*, vol. 5, 183
Biographical notes on contributors, 84, 179, 272
Birnie, G. D. (editor): *Subcellular components: preparation and fractionation*, 2nd ed., 274
BLACK, J. W. & PRICHARD, B. N. C.: Activation and blockade of β adrenoceptors in common cardiac disorders, 163
Blacow, N. W. & Wade, A. (editors): *Martindale: Extra pharmacopoeia, incorporating Squire's Companion*, 26th ed., 90
BLASCHKO, H.: Catecholamine biosynthesis, 105
—— & Muscholl, E. (editors): *Catecholamines*, 181
BLEEHEN, N. M.: Combination therapy with drugs and radiation, 54
Bleomycin, combination with radiotherapy, 57
Blood pressure control, 159
Books and periodicals for medical libraries in hospitals, 4th ed., 184
Brain, early radiation damage, 70
BRENNER, S.: The genetics of behaviour, 269
Brock, D. J. H. & Mayo, O. (editors): *The biochemical genetics of man*, 275
Bronchus, carcinoma: *Modern radiotherapy: carcinoma of the bronchus*, 88
5-BUdR, concomitant therapy with radiation, 55, 56
—— radiosensitizing effect, 49

C

Caenorhabditis elegans, genetics, 269
—— —— nervous system, 270
CAIRNS, J.: DNA synthesis, 188
CALLAN, H. G.: Replication of DNA in eukaryotic chromosomes, 192
Cancer, bronchus: *Modern radiotherapy: carcinoma of the bronchus*, 88
—— gynaecological: *Modern radiotherapy: gynaecological cancer*, 87
—— *Modern trends in radiotherapy*, vol. 2, 87
—— *Recent advances in cancer and radiotherapeutics: clinical oncology*, 87
Carcinogenesis, induction by radiation, 11, 78
—— radiosensitivity in relation to age, 82
Catecholamines, biosynthesis, 105
—— catabolism, 110
—— —— in central nervous system, 113
—— —— in peripheral tissues, 112
—— *Catecholamines* (*Handbuch der experimentellen Pharmakologie, vol. 33*), 181
—— fluorescence techniques, 93
—— functional aspects of role in central nervous system, 168
—— in invertebrates, 100
—— introduction to symposium, 91
—— metabolism, chemical structural changes during, 110
—— —— rates, 114
—— uptake and binding in storage vesicles, 133
—— —— extraneuronal, 134
—— —— neuronal, 130
—— —— processes, 130
Cells, division, effects of radiation, 10
—— —— in bacteria, 203
—— envelope, structure, 203
—— eukaryotic, cytoplasmic genetic systems of, 263
—— growth, effects of radiation, 10
—— hypoxic, in tumours, sensitization, 5
—— —— radiosensitization, chemical, 48
—— —— —— in vitro, 50
—— —— —— in vivo, 51
—— processes, regulation, 259
—— radiation damage, 16
—— —— —— repair phenomena, 19
—— —— —— sublethal, 5

SMITH, J. D.: Genetic and structural analysis of transfer RNA, 220
Smith, J. E., *see* Ashworth, J. M., 274
Structural analysis of transfer RNA, 220
Subcellular components: preparation and fractionation, 2nd ed., 274
SV40 proteins, 253
Synkavit, combination with radiotherapy, 57
—— radiosensitizing effect, 37, 63

T

TAN, radiosensitizing action on hypoxic cells, 49, 51
Testes, effects of irradiation, 72, 73
Thiazide diuretics, hypotensive effects, 159
THOMLINSON, R. H.: Radiation and the vascularity of tumours, 29
Thyroid, cancer, radioiodine treatment, 66
—— disease, benign, radioiodine treatment, 63
Thyrotoxicosis, treatment with radioiodine, 65, 66
TIPTON, K. F.: Biochemical aspects of monoamine oxidase, 116
Tumours, cells, differentiation, 25
—— —— hypoxic, sensitization, 5
—— —— kinetics, 23, 40
—— —— loss, 26
—— —— proliferation following treatment, 27
—— —— —— rate, 26
Tumours, cells—*cont.*
—— —— response to irradiation, 40
—— metastasis due to irradiation, 77
—— oxygenation as dose-modifying agent, 33, 42
—— —— hyperbaric, 33, 42
—— parenchyma, irradiation, effects, 31
—— radioisotopic localization, 63
—— radiotherapy combined with drugs, 54
—— —— fractionation of dose, 35, 40, 41
—— —— low dose-rates, 35
—— —— relation to vascularity, 29
—— —— split-dose, 35
—— *Recent advances in cancer and radiotherapeutics: clinical oncology*, 87
—— stem cells, 24
—— therapy, application of cell kinetics, 27
—— tissues, 40
—— vascularity, kinetic aspects, 26
—— —— radiotherapeutic implications, 29
Tyramine, 103

V

Viruses, animal, genetic analysis, 247
—— —— genomes, genetic structure, 248
—— —— mechanisms of recombination, 250
Vitamin K, combination with radiotherapy, 57
VOGT, M.: Functional aspects of the role of catecholamines in the central nervous system, 168

W

WADDINGTON, C. H.: Advances in molecular genetics. Introduction to symposium, 185
WIERNIK, G.: Significance of the time–dose relationship in radiotherapy, 39
WILKIE, D.: Cytoplasmic genetic systems of eukaryotic cells, 263
WINDEYER, B.: Biological basis of radiotherapy. Introduction to symposium, 1
World Health Organization: *Health hazards of the human environment*, 184

Y

Yeast alanine tRNA, 225
—— mitochondrial system, 265
YOUDIM, M. B. H.: Multiple forms of mitochondrial monoamine oxidase, 120

Z

Zygote cell-lineage analysis, 266

Printed in Great Britain by William Clowes & Sons Limited, London, Colchester and Beccles
